Requested: 13/09/2023 **Collected:** 19/09/2023 **Reported:** 21/09/2023
13:14

Serum Anti-Mullerian Hormone (AMH)

AMH (pmol/L): 28 (1-37)

Serum AMH is an indirect measure of the number of ovarian follicles:

- > 30 pmol/L - High ovarian reserve. May be normal or associated with PCOS.
- 15-30 pmol/L - Satisfactory ovarian reserve.
- < 15 pmol/L - Reduced ovarian reserve.

Method: Beckman Coulter Access AMH.

Requested Tests : MUL, TFT
