22/1/25

Anna C. round 2 f/hip + acute

PV thrush

Now 26 wks

Yet to do pertussis

Hemorrhoids - more like skin tags, haven't changed size

Thrush started a few wks ago. Using cream - Kalorex
Irritated, d/c liquid, dripping, white/yellow, no smell.
? pool, weather.

Energy ok, low iron @ 30 wks in Harvey, getting iron + B12
checked, not doing sugar challenge for GD.

Stress + more emotional

2 family members passed last yr, works been a
'nightmare' → works in HR, Boss isn't nice, work from home
Triggered more than usual. most by.
1 day/week
in office

Sleeping ok, worse end of last yr - wakening during
the night. Now tosses + turns, Day time nap.

Eating ok, nil morning sickness, aversion to plain
foods + struggles to eat veggies. Eating more protein.

Placenta issue "Extra placenta" - Drs want a c-section
emergency unnecessary c-section in Harvey.
Fear + Anxiety around same, loss of power, free will to
"Exhausted" choose
