10/2/25

Nearly 4 — speech delayed
sister.
Twin — ^{large} glucose @ birth for
low blood sugar.

Disengaged [snappy/spider veins]
[flappy].

Var'd up to 6 wks [Calc]

Generally delayed.

Colic + Constip. formula top up.

Twin sister also delayed but
not as much.

Like too much sugar. (high).
Old sister nearly 6ya

Hard to wind down @ night but
sleeps well.

Dislike ~~of~~ fruit + bit fussy, but eat
well.
~~Not~~ toilet trained after Chris adjust.

Dairy + Chemical intolerance.

BMs daily or 2/d

Drinks lots of water

Mom gestational diabetes (2)
→ glucose / bw sugars @ birth

(Hyperactive)

Can sound letters + minimal words

(Bathraps)

- loves music + dancing
- crawls ~~attention~~

Birth C-section - Eddie out first - given large dose of glucose (copy to come).

Prone to croup -> garlic sauce.

All other milestones OK - past 12mo speech esp delayed. Cognition seems OK.

Mom - high Alum - zeolite spray but not helped much.

⊗ Blood Sugar balance.
