

(♂ 7 mos) Residence McMillan 7/7/25
(ref Beverly Andrews)

CW Mom - obese J.

(*) Taking coal tar + epiderm - "helps"

(*) (*) He's constantly rubbing + scratches

face in worst [see pics] -
body mostly clear to date
but moving towards chest +
torso (front) + shoulder blade

Skin oozes if rubbed a lot + can
get infected.

→ Ibuprofen given
in past. X 3.

Hospitalised for our treatment
wet wraps - "worked" in 3 days
but keep coming back.

Breaching fire.

(*) Bowel motions - diarrhoeal / loose
(*) → on new formula "Aptamil"
(1 day old)

Tummy reactive / gassy on Aptamil
formula.

CW Mom - obese J.

Skin first started flaring 2 months
ago

(*) Had gastritis → hospital → skin
started flaring after that.

②
*IV in hospital for gastritis (Abx)
→ started w. high fever "48°C"
↳ hospital stopped feeds to run tests.
↳ formula from 1wk after birth.

Mom's birth stitches infected
→ Abx → stopped breast started formula.

Vaginal birth. Baby fine w. birth 37 wks.

↳ Induced due to low amniotic fluid — healthy but small
lots of morning sickness + dizziness.

Two hospitalisations during pregnancy: asthma + viral inf
↳ steroids + paracetamol

(*)

[Steroid detox] [paracetamol] + Abx
[Abx.] [~~Induced~~] [Vax]
[formula].

[Infected Skin combi?]

On solids now + gen. growing well.
