EXAMINATION: X-RAY CERVICAL SPINE

---

History: Chronic neck pain, old injury. Mildly restricted ROM. Power intact. ?OA.

Findings: Alignment is preserved in the scan position. Vertebral body heights and intervertebral disc spaces are preserved. Uncovertebral osteophytes are noted, contributing to mild bony foraminal narrowing, particularly on the right at C5-C6 and C6-C7. Facets align normally.

Thank you for referring this patient.
