Your Reference: Lab Reference: 25-82077852-GMC-0
Laboratory: 4Cyte Pathology
Addressee: Dr WAQAS ANSARI Referred by: Dr WAQAS ANSARI

Name of Test: Genital Culture
Requested: 20/08/2025 Collected: 20/08/2025 Reported: 24/08/2025
09:28

Clinical Notes: pv discharge? history of recurrent vaginal candidiasis?
Pathologist: Dr A. Jaksic

Genital Culture

Site: Vaginal

Gram Stain: Few white blood cells
Moderate Gram negative bacilli
Moderate Gram positive cocci
No Gram positive lactobacilli
Moderate epithelial cells
Moderate yeasts

Culture: Heavy growth of Candida albicans

Consistent with candidiasis

Gram-stain shows altered vaginal flora. If bacterial vaginosis is clinically suspected, suggest repeat test in 4 weeks.

Tests to follow: All Tests now completed

Name of Test: Genital Culture
Requested: 03/03/2025 Collected: 03/03/2025 Reported: 06/03/2025 11:32

Clinical Notes: 25-81386160 , rhp
Pathologist: Dr A. Jaksic

Genital Culture

Site: Vagina

Gram Stain: Few white blood cells
Moderate Gram positive lactobacilli
Moderate Gram positive cocci
Moderate Gram negative bacilli
Numerous epithelial cells
Few yeasts

Culture: Moderate growth of Candida albicans

Consistent with candidiasis

Microscopy has low sensitivity for the detection of Trichomonas vaginalis. PCR is the test of choice. Please contact the laboratory (13 42 98) within 24 hrs if T.vaginalis is suspected in order for us to proceed with PCR testing on this submitted specimen.
