#### CERVICAL SPINE RADIOGRAPHS

Clinical History: ?Facet joint arthropathy.

Findings: There is no prevertebral soft tissue swelling.

There is mild stiffness at C6/7 between flexion and extension, with no instability.

Alignment is unremarkable. There is no significant loss of disc space height and no facet joint arthropathy on plain radiographs. There is no bony narrowing of the neural foramina.

Mild bilateral C6/7 uncovertebral arthropathy is present. Minor changes on the right at C5/6.

Comment: Minor lower cervical uncovertebral arthropathy as described.

No significant facet joint arthropathy on plain radiographs.

Thank you for your referral.

Yours sincerely,

Dr Sam Gane - SKG Radiology
