Ref: (12 - 31) (20 - 45) (15 - 55) (30 - 400)

88426465 Ferritin suggests adequate iron stores.

Iron Studies Update 29/03/2016

The ferritin reference range has been updated with adult lower limits of 30 now for all. The reports have also been updated to take account of the following:

- As ferritin is influenced by acute phase responses results in the lower-normal range (30-100) may not exclude iron deficiency.
- Ferritin levels >100 and < upper limit usually reflect adequate iron stores.
- Serum iron is useless in determining tissue iron stores.

Total PSA (0.30-3.5)	1.9	2.2	2.5	3.0	ug/L

PSA PSA measured using Abbott Architect.

Comments on Collection 10/07/18 0819 F:

PSA

In men aged 55 - 59 years, the median total PSA is 1.1 ug/L.

A total PSA within the age-related reference interval but above the median may be associated with an increased risk of prostatic neoplasia. If indicated, suggest review PSA status in 12 months with free/total PSA ratio.
