

**ALEXANDRA MIDDLETON**  
NATUROPATHIC NUTRITIONIST

**TREATMENT PLAN -1/12/21 Madi Gillespie**

**Diet recommendations**

- Refer to amines sheet - follow as closely as possible optimal diet for pain, fatigue, clenching; continue to avoid gluten, cow dairy and alcohol.
- Eat foods containing resistant starch daily. These foods will be used by your butyrate producing bacteria to produce more butyrate therefore will diversify and strengthen your microbiome and immune system. Resistant starch is found in cooked and cooled potatoes, rice, pasta (pref GF), legumes, cashews, soaked (not cooked) oats. Try to ensure you have at least one of these foods every day.
- Drinking tulsi tea during day for energy
- Continue with JS Vitality X + collagen daily
- If you need a cup of caffeine while you adjust to the Amitriptyline have a cup of early grey (as it has other benefits)
- Limit alcohol on Amitriptyline - can increase effects/ make hangover much worse

**Assessments/referrals**

- N/A

**Other**

- Prometrium orally from ovulation to 2-3 days before period is due
- Castor oil packs/ heat packs for ovulation/period pain - ideal is black organic castor oil
- Jane Lyttleton at paddington medical centre - take to her about herbs and acupuncture.
- Clary sage/ rose 3% essential oils into pelvis and lower
- Sinus - try and find this online: <https://xlear.com>

**Vaginal Pessary**
