

# GENEA OVULATION TRACKING REPORT

Referrer name: Emma Scott	Provider ID: 2485956L
Patient name: Imogen HARPER	DOB: 11/09/1986 Medicare card: 27352759831

Dear Dr Emma Scott

Thank you for referring your patient (**Imogen HARPER**) to Genea for Bulk Billed Ovulation Tracking.

After undergoing ovulation tracking, your patient has unfortunately not been successful at achieving a positive pregnancy result. Please find a summary of the results on the next page for your records.

Should you have any questions regarding these results, please contact our Ovulation Tracking Coordinators on:

1300 117 698 or email: [ovulationtracking@genea.com.au](mailto:ovulationtracking@genea.com.au)

## What happens from here?

We have advised your patient to return to you for further fertility investigations as indicated by you on the original referral form.

If you and your patient decide that a referral is the best option, our highly qualified Genea Fertility Specialists can conduct further tests to help determine any underlying causes and treatment options. To make this step easier we have attached a referral form including a doctor directory.

Once again, thank you for referring your patient to Genea for Ovulation Tracking.

Kind regards,

The Genea Ovulation Tracking team
