Comments on Collection 28/09/21 0850 F:
High levels of thyroglobulin and thyroid peroxidase antibodies occur in Hashimoto's disease. Lower levels can occur in clinically normal persons and with other thyroid disorders.

Comments on Collection 28/09/21 0850 F:
 Serum iron may be reduced in the presence of an intercurrent illness.
 As ferritin is an acute phase reactant, in the presence of inflammation,
 this ferritin level does not exclude iron deficiency. Recommend follow up
 iron studies.
