## Patient Initiated Request for Release of Results.

Please be aware that your patient has requested a copy of their own results.

Consistent with the guidelines of the Royal College of Pathologists of Australasia, we believe that the primary relationship in the diagnostic process is between the requesting doctor and the patient. However, Melbourne Pathology must comply with this request in accordance with our legal responsibilities to the patient under the Health Records and Privacy Acts. This report is provided to alert you to the patient request.

Given the varied ways in which practitioners request delivery of results and the number of patients who request release of this information, it is not possible to confirm that an individual practitioner has reviewed all results before they are released to the patient. Patient copies however, will not be released until all tests on the episode are completed, consistent with the MyHealth Records process. We trust this delay will give you time to review the results in anticipation of any concerns or questions that may arise from your patient.

We respect that an individual referrer or practice may prefer their patients only receive results directly through their clinic, with the consent of the doctor. We would suggest this can be successfully achieved through local policy and procedure, i.e. patient education to make the clinic/doctor preference clear at the time of attendance.

We thank you for your understanding in this matter.
