Broadbeach Family Practice

22/04/2023

Dear Dr Talbot,

RE: Ms Erin Gallienne
DOB: 13/07/1984 (38 Years 9 Months)
Address: 9 / 1 Bronberg Court, SOUTHPORT, QLD, 4215
Phone: 0422-392-861

Many thanks for your continued care of the delightful Erin. Erin has felt a little unwell in the last few months, but has not had any frequent headaches or nausea. Today Erin's right optic nerve appeared a little superiorly raised on OCT scan. Erin's visual fields were full in both eyes. The results of our consultation today are as follows:

Unaided Vision:
R 6/6 **L** 6/6- **OU** 6/6

Internal Ocular Health: R optic nerve slightly raised on OCT

IOP R 10 mmHg **L** 12 mmHg at 11:30am with ICare.

Visual fields: full fields of vision R&L

We will continue to monitor Erin's right optic nerve in the next few weeks, however Erin was encouraged to see yourself for systemic investigation. I hope this assists in your care of the lovely Erin.

Warmest regards,

Celia Bloxsom
