RACHELLE SHARON CUI-ER FREDERICK

ID: 29976 IC: S9746189I

To the Attending Physician / General Practitioner,

Dear colleague,

Rachelle is a most pleasant young lady who saw me when she was back in Singapore from her studies in Australia. She experienced GI symptoms after her COVID vaccination, characterised by abdominal pain, bloating, dyspepsia and burping. There would be food triggers (rich and oily food), peri-menstrual symptoms as well as stress triggers.

The impression was that of gastritis with dysmotility overlapping with functional bowel disorder.

The symptoms are now well controlled with on-demand medications. She is on rabeprazole, amitriptyline, colpermin and the occasional domperidone.

I have asked her to approach your goodself for continuation of medication should she run out of her current supply.

Yours sincerely,

Dr. Lui Hock Foong
