Dear Mei,

RE: Mrs Rachelle Frederick DOB: 19/12/1997
U1 122 King Arthur Dr Glen Waverley 3150
(M) (H) 0427371179
Medicare No. : -

Thank you for seeing Rachelle age 25 yrs for an opinion and management of pelvic pain and severe dysmenorrhoea. She has been seen in Singapore and likely has endometriosis however has not had any laparoscopy. She struggles with hormone treatments and is very sensitive to medications. She also suffered pretty decent chemical gastritis from NSAIDs. Are there any other options?

Active Past History:

Adenomyosis

Likely endometriosis as well

Allergies:

zyrtec D heart palpitations

Current Medications:

Pramin 10mg Tablet	1 tablet, three times a day if required.
Rabeprazole 20mg Tablet	1 Tablet Daily As directed p.r.n.

Investigations:

Frederick, Rachelle

PELVIC ULTRASOUND

Clinical Notes: Severe dysmenorrhoea.

Findings: Transabdominal study.
Uterus is normal volume 19cc. Endometrium is well defined with measuring 3mm in thickness.
Right ovary volume 5cc with multiple small follicles measuring up to 7mm (twenty eight counted).
There is a leading follicle measuring 19mm in diameter in the left ovary with ovarian tissue wrapped around it. No solid mass. No further follicles.
Kidneys are normal. No pelvic free fluid.

Comment: Dominant follicle left ovary measuring 19mm. Multifollicular appearance of the right ovary shown.
