ULTRASOUND PELVIS

Clinical History:  
Severely painful periods.

Report:

Transabdominal and transvaginal studies have been performed.

The uterus is anteverted and measures 7.8 x 3.1 x 2.8cm, 48cc. The total endometrial thickness is just over 6mm.

The right ovarian volume is just over 3cc and the left ovarian volume is just over 3.3cc.

The endometrium is proliferative. The overall texture is homogenous. There is evidence of symmetrical anterior posterior wall thickness currently.

A tiny juxta endometrial cyst is again demonstrated measuring 4mm.

Nontender mobile organs. There are no other diagnostic features.

Comment:

No definite cause for the clinical features.

Thank you for your referral.

Kind regards,

DR GARY GEIER  
MBBS, FRCR
