Gynaecological Ultrasound

Patient: **Aparna Godse** DOB: 26/12/1977
 2/14 Morrison Court MOUNT WAVERLEY 3149
Exam date: 10/07/2023

Indication: Recent CT for investigation for fatty liver suggested endometriosis (15 left ovarian cyst with adhesions).
 Nil symptoms of dysmenorrhoea or infertility.

Method: Transvaginal ultrasound.

Uterus: Size 71 mm x 52 mm x 38 mm. Vol 72.7 cm³
 Size: Normal
 Position: retroverted
 Malformations: none
 Endometrium: Structure: proliferative.
 Endometrial thickness, total 1.7 mm
 Cervix details: Normal ultrasound appearance.
 No fibroids identified
 No polyps identified

Right Ovary: Easily seen. Normal appearance, mobile and non tender. Size 15.2 mm x 9.5 mm x 18.7 mm. Vol 1.4 cm³

Left Ovary: Easily seen, adherent to the uterine fundus. Size 17.0 mm x 15.9 mm x 10.9 mm. Vol 1.5 cm³
 Cyst resolved

Pouch of Douglas: No evidence of free fluid. Good POD mobility. Non tender. The bowel is mobile over the uterus.

Conclusion: Left ovary adherent to the uterine fundus. Left ovary cyst resolved ? corpus luteum.
 Otherwise a normal pelvic scan. No obvious suggestion of DIE.
