X-RAY CERVICAL SPINE

Clinical Notes:

Long-standing pain, worse on the right. Check degen

Findings:

Normal atlantoaxial interval. Normal cervical spinal alignment.

Vertebral body heights are maintained with no compression fracture or destructive osseous lesion. Disc/end plate degenerative changes are noted at C4/5 and C5/6. Mild bilateral facet arthropathy noted in the mid cervical spine. No neural exit foraminal narrowing is demonstrated in the cervical spine.
