Comments	E2 slightly elevated due EPP - ovaries quiet. Start. JM			limited response. same dose and RTC in 2 days for USD/BW - JM		Same dose. RTO 2d sono/E2 - SEA		start ant, inc, back in 2d-sb		same and back in 2d - sb		same dose. RTO tomorrow for BWUS, anticipate trigger tomorrow - MTC	high rate of immaturity in her prior cycle. Suspect she will need an additional 1-2 days. Please review cycle in AW 5/13 mature even with many in the mature range. JM Decrease menopur per grid. RTO tomorrow for BWUS - MTC	Recommendation was for a 09:30 PM EDT Lupron trigger. However patient requesting not to trigger. Reviewed progress note by Dr. Roth on 7/25 and Dr. Morris on 8/24. Plan is to push an extra day per the notes. Patient requesting another day. Plan same and back tomorrow. sb/JLM
