## Discharge Referral

### Emergency Medicine

(Emergency Department Discharge Referral MedChart)

**MRS Sonja Lee LEITCH**

**2476135 /N0353581**

[DoB: 12/04/1972] Female

13367 Newell Highway, Bobbiwa South, Narrabri, NSW,  
2390, Australia

Ph: 0428609299

**To:** Dr Dilini Amuhenkanda PATHIRATNE

**Admitted:** 06/09/2023 13:43

**Room:** TAMETZWR

#### Hospital Address

Tamworth Hospital  
Dean Street Tamworth NSW 2348  
Telephone: (02) 6767 7700  
Fax: (02) 6766 1027

#### ED Attendance Details (Abbreviated)

Start Date: 06 Sep 2023 13:43 End Date:

Seen By: MEAGHER, Dr Georgia

Triage Nurse Notes: referred from tamworth eye centre Dr Hinchliffe for admission for bilateral papilloedema. Had CT scan yesterday and MRI this AM. pt c/o nausea, blurred vision for the last 3 weeks. walked into ED. pmhx breast CA, hysterectomy. NKDA.

#### Presenting Problem and Significant Events

51 F referred for admission by Ophthalmologist for investigation of B/L papilloedema and fatigue + 10kg weight loss

- Patient was very well and extremely active upto 6 months ago, when she started suffering from earache – nil discharge/fevers. GP prescribed a course of antibiotics which didn't work, then prescribed another course following which earache improved
- Patient felt nauseated with loss of appetite throughout, and lost 5kg weight
- Ear ache subsequently improved, and patient went to Darwin to visit her daughter
- Continued to feel extremely fatigued and nauseated, with constipation on coming back – referred to Dr Van Schoor(surgeon) for upper and lower GI scope – which were normal
- GP diagnosed the patient with Ross River fever upon return
- Patient continues to lose weight due to loss of appetite and ongoing nausea, and has lost another 5kg in the last 4-6 weeks
- Feels dizzy on getting up and doing minimal activity, feels lightheaded with visual blackouts on mobilising even a little bit. Lies in bed almost all day
- Had a syncopal episode while sitting out in the sun at home, when she tried to stand up
- Denies fevers/night sweats/rash/joint pain/runny nose/cough/chest pain/abdo pain/other infective symptoms
- Denies headaches/weakness
- Denies any emotional stress
- Nil travel other than Darwin this year
- Has 2 dogs, sheep, cattle, horses at home

#### BACKGROUND:

- Breast ca – Wide local excision + adjuvant chemo 4 cycles + radiotherapy 2014
- Hysterectomy

**MEDS:**

Anastrozole

**SOCIAL:**

- Lives at home with husband
- Has 3 children
- Non smoker, no EToH
- Dogs, cattle, sheep, horses
- Works as a primary care teacher

**O/E:**

Conscious, oriented to TPP. Husband present  
P 90/min ; BP 105/70 ; Sats 99% RA ; afebrile  
HSDNM ; Chest : clear ; PA : SNT ; No rashes/joint swellings  
Nil palpable cervical LN  
Normal visual fields + EOM – no diplopia  
No cranial nerve palsies

**INV:**

WCC 7.4 ; Hb 130 ; Plt 247 ; EUC/LFT neg ; |CRP 0.2

COVID neg

CTB + MRI brain (contrast) : chronic white matter ischaemic changes. Normal ventricles. No acoustic neuroma.

CSF done with consent under sterile conditions:

Opening pressure 16cm H2O (normal)

sample sent for mcs, proetin, glucose, cell count

Idiopathic Intracranial Hypertension unlikely as CSF pressures low  
CRP low, unlikely infection/autoimmune

Discussed with Dr David Scott (genmed)

Plan:

- dc home
- F/U with GP in a week for r/v of progress
- GP to kindly chase CSF results
- Please come to ED/call your GP if any concerns

Reagards,

TRRH medicine

**Diagnoses**

Primary Diagnosis

- Papilloedema for investigation

**Relevant Pathology Results (only results from 30 days prior to today til now)**

Haematology 06/09/2023 15:35 : Full Blood Count Order Number: 604305259

- 1.) White Cells :  $7.4 \times 10^9/L$  (4.0 –  $11.0 \times 10^9/L$ ) N
- 2.) Red Cell Count :  $4.28 \times 10^{12}/L$  (3.80 –  $5.80 \times 10^{12}/L$ ) N
- 3.) Hb (Haemoglobin) : 131 g/L (115 – 165 g/L) N
- 4.) Haematocrit : 0.382 L/L (0.320 – 0.460 L/L) N
- 5.) MCV : 89 fl (80 – 100 fl) N
- 6.) MCH : 30 pg (27 – 32 pg) N
- 7.) MCHC : 342 g/L (310 – 360 g/L) N
- 8.) RDW : 12.7 % (< 15.0 %) N

## CT SCAN OF THE CHEST, ABDOMEN AND PELVIS

### CLINICAL NOTES

Weight loss. Loss of appetite. Previous breast cancer 9 years ago with a lumpectomy.

### PROCEDURE:

Post contrast images have been performed.

### FINDINGS:

#### CT SCAN OF THE CHEST

There is reduced glandular tissue in the right breast in keeping with the previous lumpectomy. No a biliary, hilar or mediastinal lymphadenopathy is evident. The thyroid gland appears normal.

#### CT SCAN OF THE ABDOMEN AND PELVIS

There is a dependent calculus in the gallbladder measuring 7 mm in diameter. The gallbladder wall does not appear thickened. No focal hepatic, splenic or pancreatic abnormality has been demonstrated. The adrenal glands appear normal. No renal abnormality is visible.

The colon is loaded with faeces throughout. No definite focal colonic or small-bowel abnormality is evident.

The patient appears to have had a previous hysterectomy. No adnexal mass is evident.

At L4-5 disc height loss and endplate spondylotic changes are visible. No focal lytic or sclerotic bony lesion is evident. There are multiple old rib fracture is evident on the left.

### CONCLUSION:

Old left-sided rib fractures are evident. There is no evidence currently of a mitotic process in the chest or abdomen.

## Specialty clinical information

## Referral Letter

Referral letter (up to 5000 characters)

Dear Dr George

Sonja has been very sick with loss of appetite and weight loss (significant weight loss of 10 kg within the last 6 months, She had colonoscopy, Gastroscopy and CT scan which hasn't explained a cause for her weight loss. As she has previous history of her breast cancer, I would appreciate if you could review her to consider PET scan and further management

## Investigations and Reports
