12 May 2023

Dear Miss Morgan

Your breastscreen has been reviewed independently by two specially trained doctors. Having two pairs of skilled eyes analysing your breastscreen means that your results are as accurate as possible. We are pleased to inform you that **no signs of breast cancer were found** on your recent breastscreen at the BreastScreen Queensland Elanora Mobile Service.

The recommended time for your next breastscreen is May, 2025. We will send you a reminder when you are next due.

Sometimes breast cancer can occur in the period between breastscreens, so it is always important to be aware of the normal look and feel of your breasts. If you find a breast lump, a nipple discharge or any breast changes that concern you, please contact your doctor without delay.

Should you have any concerns or further questions, please don't hesitate to call our friendly staff at BreastScreen Queensland on 13 20 50.

Yours sincerely
