Dear Dr Yesudas

**X-RAY RIGHT KNEE**

**Indication:**

Posterior knee pain.

**Findings:**

Normal anatomical alignment of the knee joint. There is minor medial tibiofemoral compartment narrowing and patellofemoral compartment narrowing. Minor osteophytic change with no subchondral cystic change identified. There is minor quadriceps enthesopathy with normal appearance of the patellar tendon. Hoffa's fat pad is normal. No joint effusion or sinister osseous lesion identified. No acute fracture. Minor vascular calcifications. No popliteal abnormality identified.

Thank you for referring this patient.

Kind Regards,

Electronically Signed by:

**Dr Jonathan Hall**
