Thank you for seeing this 27yrs 2mths male. He suffered Pericarditis from Pfizer Covid 19 vaccine in 10/2021 and was admitted to Hospital and since that time, he has been under review by Dr Aggrey Kiyingi. He continues to have intermittent chest pain and Palpitations. He has been on Colchicine 500mcg bd.

He tells me that Dr Kiyingi is not practising anymore and wonders whether you would be happy to take over his ongoing monitoring and management.

Active Problems:
