A/Prof John Drago Patient ID: 77.8146821
Warrigal House Accession Number: 77.44069948
403 Warrigal Road
Burwood 3125
Tel: 0398088200
26th June 2023 Reported: 27 June 2023

Dear A/Prof Drago

Re: Ms Tahlia CREMA - DOB: 07/02/1987
2901/201 Normanby Road SOUTHBANK 3006

MRI BRAIN AND SPINE

CLINICAL INDICATION:
36-year-old female, episodic weakness, disequilibrium.

TECHNIQUE:
Brain - Non contrast sagittal T1, axial FLAIR, T2, T1, SWI, DWI/ADC.
Spine - Sagittal TIRM, T2. Axial T2.

COMPARISON:
None available.

FINDINGS:
BRAIN
No abnormal T2/FLAIR hyperintense signal, abnormal restricted diffusion, or intra-axial mass.
Normal morphology with normal T1 and T2 signal.
In particular, the cerebellum is unremarkable.
Ventricular system and CSF spaces are unremarkable.
Normal intracranial vessel flow voids.
Paranasal sinuses and mastoid air cells are well-aerated.
Orbits and soft tissues unremarkable.

SPINE
No abnormal cord signal abnormality or mass.
No critical canal or foraminal stenosis.
Normal thoracic spine alignment.

CONCLUSION:
No cause for patient's symptoms identified.

nmol/L (20-190)

301
301 Comments on Collection 28/06/23 1152:
301 Elevated vitamin B6 is most likely due to excess
consumption. B6 is present
301 in many over the counter preparations (including magnesium
supplements) and
301 in energy drinks. B6 > 250 nmol/L is associated with
peripheral neuropathy.
301 For patients not consuming excess B6, elevated levels may
indicate
301 Hypophosphatasemia. This condition is rare and patients
will have low
301 alkaline phosphatase and high urine phosphoethanolamine.
301

301 Reference Range: (Anticardiolipin IgG antibodies)
301 Negative: <10 GPL-U/mL
301 Weak Positive: 10-40 GPL-U/mL
301 Positive: >40 GPL-U/mL
301
301 Reference Range: (Beta 2 Glycoprotein 1 IgG antibodies)
301 Negative: <7 U/mL
301 Weak Positive: 7-10 U/mL
301 Positive: >10 U/mL
301
301 IgG aCL/B2GP1 negative. A small proportion of patients with
301 antiphospholipid antibody syndrome (APS) have undetectable IgG
301 anticardiolipin or anti-B2GP1 antibodies. Consider tests for lupus
301 anticoagulant if APS is clinically suspected.
301
301 * aCL IgG = Anticardiolipin IgG (Phadia EliA)
301 * B2GP1 = Beta 2 Glycoprotein 1 IgG (Phadia EliA)

Vitamin B6 (p5p)

390 nmol/L^nmol/L 20-190

_vitamin B Virtual

Comment for _VITAMIN B VIRTUAL
Elevated vitamin B6 is most likely due to excess consumption. B6 is present in many over the counter preparations (including magnesium supplements) and in energy drinks. B6 > 250 nmol/L is associated with peripheral neuropathy. For patients not consuming excess B6, elevated levels may indicate Hypophosphatasemia. This condition is rare and patients will have low alkaline phosphatase and high urine phosphoethanolamine.

Please note VITB6* collection date: 30/06/2023 09:18

Anti-dna (feia)

<^7 IU/mL^IU/mL <10

Se-autoantibodies

Comment for SE-Autoantibodies

A negative anti-dsDNA result alone does not exclude SLE. Anti-DNA antibody levels may drop below 7 IU/mL in SLE patients receiving immunosuppressive therapy.

Anti-DNA(FE): Anti-dsDNA by fluorescent enzyme immunoassay (Phadia EliA).
