request form.

Vitamin C (Ascorbate) 11 L (26 - 85) umol/L

Comments on Collection 686691836

Although uncommon in developed countries, Vitamin C deficiency can occur due to very poor diet (especially in the elderly, alcoholics or the mentally ill), or accelerated loss as in renal dialysis and acute heat stroke.

Vitamin C has poor in-vitro stability. Plasma samples must be light protected and frozen within 2 hours of collection and must remain frozen until just prior to analysis. Sub-optimal sample treatment can contribute to falsely low results.

The reported result is likely to be lower than the true biological value as the sample was not protected from light and frozen immediately after collection and during transport.

* Please note Ascorbate collection date: 07/12/2023 00:00
