Received 04/11/2023 07:28

Chlamydia trachomatis PCR

Site
C.trachomatis DNA

Urine
NOT DETECTED

Comments

The sensitivity of the Chlamydia / Neisseria gonorrhoeae PCR depends on the quality of the specimen collected. It is strongly recommended that the following instructions be followed.

Urine specimens should contain the first 10-50 mL of urine passed at least one hour after the patient last voided. For cervical swabs, mucus or purulent material should be cleaned from the cervix before sampling with a second swab.

Please note U-CTPCR collection date: 08/11/2023 04:30
