Referring Physician	SHRESTHA, SARJU	Modality	US

X-RAY AND ULTRASOUND LEFT ELBOW

HISTORY:

Elbow joint pain.

COMPARISON:

None available.

FINDINGS:

X-ray:

The elbow joint has a normal radiographic appearance. The joint spaces are maintained. Articular margins and surfaces are smooth.

There is no spurring of the epicondyles.

Ultrasound:

There is no elbow joint effusion.

The common extensor and flexor tendon origins are normal.

The distal biceps and triceps tendons are normal.

COMMENT:

Normal x-ray and ultrasound. A cause for pain has not been identified.

Reporter: Dr A. Gunn
