Collected 20/03/2024 10:20

Received 20/03/2024 10:41

Genital Mycoplasma PCR

Site	High vaginal swab
Mycoplasma genitalium DNA	Not Detected
Mycoplasma hominis DNA	Not Detected
Ureaplasma species DNA	Not Detected

Comments

While there is evidence to support the role of Mycoplasma hominis and Ureaplasma species in conditions related to parturient women, their fetuses and newborns, other disease associations remain unproven or speculative. Because asymptomatic genitourinary colonisation is so common and proven disease so rare, inappropriate diagnosis and unnecessary treatment are the unavoidable outcomes of unrestricted testing.

Reported by Douglass Hanly Moir Pathology(2178), a member of the Sonic Healthcare Group.
