Laboratory: SNP  
Addressee: DR ANTHONY G REYNOLDS Referred by: DR ANTHONY G REYNOLDS

Name of Test: BNP VIRTUAL  
Requested: 15/03/2024 Collected: 16/03/2024 Reported: 17/03/2024  
20:24

Clinical notes: . Fasting.

Clinical Notes : . Fasting.

**BNP**

NT-proBNP (Roche) 112 ( <450 ) ng/L

Comments on Collection 525116338

Among patients with dyspnea, NT-proBNP is highly sensitive for the detection of acute congestive heart failure. In addition, a NT-proBNP <300 ng/L effectively rules out congestive heart failure with 99% negative predictive value. Knowledge of each individual's NT-proBNP level may be more useful than using single cut points for every patient.

Falsely low NT-proBNP in congestive heart failure patients may be observed with increasing body mass index.

Conversion factor: ng/L (pg/mL) x 0.118 = pmol/L
