- Reason for Visit PPIU

**ALLERGIES:**

No Known Allergies: Active

**PROBLEM LIST:**

**Visit Reason:**

- New Outpatient Visit: Status: Active, Scope: Visit, Onset Date: 04-08-2023, Description: New Outpatient Visit

**CLINIC SUMMARY:**

**CLINIC SUMMARY:**

- Summary of Appointment

G7 P1. Aged 45 now.

Was seen in 2015, full work up detected a small septum, this was removed, and she had a daughter. 33/40 with GDM in that pregnancy.

Nil else treated.

Since then more miscarriages. Understands the realities of her age, but still keen to try. Not keen on donor embryos.

Given the GDM, repeat GTT and insulin studies to exclude HI.

Phone call in 5-6 weeks for results. (Vitamin D, B12)

- Follow Up Plan Reappointment (Note: appointment request must be completed)
- Reason for Repeat Appointment Follow up of investigation
- Send letter to: No letter required
- Printer Address \\HLT430VPRTO01\WCH-Printer-0051-Plain

**GENERAL INFORMATION:**

- Date/Time of Call 06-09-2023 14:37
- Call From/To patient, clinician
- Caller/Called Name Dr C D McCormack

• Reason for Call & Call Summary

Follow up of visit.

Aged 45, still wanting pregnancy.

Bloods not in SA path.

Bloods traced, essentially normal, mildly decreased Vitamin D.

Given husbands age of 51, and Lisa's age of 45, chances of a normal pregnancy carrying to term are remote.

IVF a potential, but would most likely suggest ovum donation.

Lisa realistic.

**ALLERGIES:**

No Known Allergies: Active

**Electronic Signatures:**

Thanks for the referral & apologies  
that the letter did not reach you  
Essentially nil found, most likely  
are age factor.

*C. McCormack*
