Comment for SE-_Vitamin B12
Both B12 and active B12 are in the normal range.
Vitamin B12 deficiency is unlikely.

Testing of active B12 is routinely performed for people that have low or equivocal vitamin B12 results (<400 pmol/L) to clarify their B12 status. Both tests are Medicare rebatable. Those with vitamin B12 concentrations over 399 pmol/L are generally replete.
