Methylene Tetrahydrofolate Reductase Gene Mutation

MTHFR c.665C>T **Heterozygous**
MTHFR c.1286A>C **Heterozygous**

Comment

Heterozygosity for either variant is common and not associated with clinical disease. There are no interventions recommended for patients who are heterozygous for these variants individually or who are compound heterozygotes.

MTHFR test information:

Detection of the c.665C>T and c.1286A>C variants of the MTHFR gene is performed by melt curve genotyping PCR using the Tib Molbiol MTHFR C667T and MTHFR A1298C Light mix IVD kits.

Other variants in the MTHFR gene are not tested and therefore will not be identified.
