The charts on this page are designed to give you a bird's-eye-view of your current metabolic signature and help you get a general preview of the detailed report found on the following pages.

## METABOLOMIC SIGNATURE

### Identifying Impact of Functional Categories

Findings show that 2 of 6 Functional Categories have markers beyond the reference range.

Subcategories are identified below.

### Identifying Impact of Subcategories

NOTE: Below is a list of the Functional Categories and the included subcategories. It lists the percentage of markers that are beyond the reference range so clinicians can better target areas of concern.

#### PERCENT OF MARKERS BEYOND THE REFERENCE RANGE

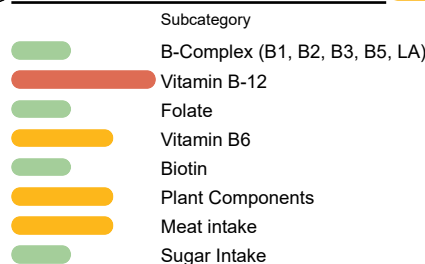

#### 1. Metabolic Processing 18 %

#### 2. Amino Acid & Protein Metabolism 20 %

#### 3. Nutrition 29 %

#### 4. Stress & Mood 14 %

#### 5. Toxic Impacts 13 %

#### 6. Microbial Metabolites 33 %

## PERSONALIZED METABOLOMIC RECOMMENDATIONS

*Note: Nutrient supplementation is up to the treating clinician's discretion with full understanding of the patient's medical history and current clinical condition.*

MICRONUTRIENTS	Support Required	Recommendations	Food Sources
<b>B-Complex</b>	None	No Additional Support	Mixed diet
<b>Thiamin (B1)</b>	None	1.2 mg*	Rice, wheat germ, lentils, peas, pork, whole wheat bread, spinach
<b>Riboflavin (B2)</b>	Moderate	30 mg	Milk, almonds, eggs, salmon, chicken, broccoli, spinach
<b>Niacin (B3)</b>	None	16 mg*	Chicken, tuna, turkey, cereal, peanuts, lentils, coffee
<b>Cobalamine (B12)</b>	High	500 mcg	Clams, mussels, mackerel, crab, beef, salmon, milk, eggs
<b>Folate (B9)</b>	None	400 mcg DFE*	Lentils, garbanzo beans, spinach, asparagus, lima beans, orange juice
<b>Biotin (B7)</b>	None	30 mcg*	Eggs, liver, salmon, avocado, raspberries, cauliflower, bread
<b>CoQ10</b>	Moderate	60+ mg	Beef, herring, chicken, canola oil, Rainbow trout, peanuts, pistachio nuts, broccoli
<b>Magnesium</b>	None	420 mg*	Beef, pork, milk, cod, chicken, avocado
<b>Carnitine</b>	None	10+ mg	Beef, pork, milk, cod, chicken, avocado
<b>Copper</b>	None	0.9 mcg	Eastern oysters, crab meat, clams, cashews, sunflowers, hazelnuts, almonds

\* DV or Daily Values, are the recommended amounts of nutrients per day for a healthy, non-deficient adult.

PROTEIN	Findings	Suggested Recommendation
<b>Phenylalanine</b>	Adequate	No Additional Support
<b>Isoleucine/allo-Isoleucine</b>	Adequate	No Additional Support
<b>Leucine</b>	Adequate	No Additional Support
<b>Valine</b>	Adequate	No Additional Support
<b>Tryptophan</b>	High	Represents protein intake 24-48 hrs before collection; higher in fish-eaters; check BMI and nutrient cofactors
<b>Methionine</b>	Adequate	No Additional Support
<b>Threonine</b>	Adequate	No Additional Support
<b>Lysine</b>	Adequate	No Additional Support
<b>Histidine</b>	High	Represents protein intake 24-48 hrs before collection; consider liver status, anemia, allergies and asthma; check folate and carnitine levels
<b>Arginine</b>	Adequate	No Additional Support
<b>Glycine</b>	Adequate	No Additional Support
<b>Taurine</b>	Adequate	No Additional Support

ADDITIONAL SUPPORT	Support Required	Suggested Recommendation
<b>Glutathione Need</b>	None	No Additional Support
<b>Inflammation</b>	None	No Additional Support
<b>Liver Parameters</b>	Moderate	Consider liver support such as, glycine or serine, omega-3 fatty acids, vitamin E, antioxidants and fiber rich foods; avoid saturated fats and added sugars.
<b>Kidney Parameters</b>	None	No Additional Support
