**Comment:**

Estimated GFR (eGFR) helps us know how the kidneys are working. eGFR is based on the creatinine blood test result, age, sex, and body size. Monitoring eGFR over time helps us understand changes in kidney function.

Actual kidney function may be better or worse than the estimated GFR because

**12/15/2022 - Orders Only in FAMILY PRACTICE (continued)****Labs (continued)**

blood creatinine levels are affected by body make up, diet, hydration, genetics, and more.

Multiple eGFR values are used to determine chronic kidney disease (CKD) stages, defined by the following ranges:

eGFR 45 - 59 = Stage 3a

eGFR 30 - 44 = Stage 3b

eGFR 15 - 29 = Stage 4

eGFR under 15 = Stage 5

Values for eGFR before 05/25/2022 will appear in lab results under "Past results".
