Ross River Virus (RRV) Serology (ELISA)

| | |
|---------|----------|
| RRV IgG | Positive |
| RRV IgM | Positive |

Comments

Tested in parallel with the previous specimen.
No change in antibody level demonstrated.
Results are most likely a cross-reacting IgM with past exposure to RRV,
however clinical correlation is required to determine the significance of this
result.

Ross River virus testing performed by EIA.
