DR NEELS MYBURGH  
66-70 MAHOGANY DRIVE  
HALLS HEAD WA 6210

**MS TRACY HARRINGTON** (02/11/1965)  
28 STEPMOON STREET  
FALCON WA 6210

**Service Date** 13/10/2022  
**Patient Id.** SKG1608251  
**Episode No** MAN10788521

**MRI CERVICAL SPINE**

**Clinical History:** Neck pain and radiculopathy symptoms down right arm.

**Findings:** There is mild anterolisthesis of C3 upon C4 and C4 upon C5. No cervical cord lesion or myelopathy. The imaged posterior fossa is normal.

At C2/3, cervical canal and neural foramen are patent. There is osseous fusion of left facet joint.

At C3/4, cervical canal is patent. Severe right and moderate left facet joint degeneration. Mild bilateral foraminal narrowing.

At C4/5, cervical canal is patent. Severe left facet joint degeneration. Moderate left foraminal narrowing due to left uncovertebral and facet joint osteophyte.

At C5/6, severe disc degeneration. Posterior disc osteophyte complex causing mild cervical canal narrowing. Moderate to severe right and severe left foraminal narrowing due to bilateral uncovertebral joint osteophytes.

At C6/7, cervical canal and neural foramen are patent.

At C7/T1, cervical canal and neural foramen are patent. There is a left perineural cyst as an incidental finding.

The left thyroid gland appears heterogeneous.

**Comment:** Severe disc degeneration at C5/6. Moderate to severe right and severe left foraminal at C5/6 due to bilateral uncovertebral joint osteophytes. There is bilateral C6 nerve roots impingement.

**Severe facet joint degeneration on the right at C3/4 and on the left at C4/5.**

**No high grade cervical canal stenosis.**

**The left thyroid gland appears heterogeneous. Thyroid ultrasound is recommended for further evaluation.**
