25th November 2022

Dear Dr Ellacott

RE: Rochelle Craker DOB: 17/02/1988 NHS:
106 Falkland Rd, London, N8 0NP

Diagnosis: Mild-moderate ME/CFS

Thank you for referring Ms Craker to the Royal Free London, Chronic Fatigue Service, following a long history of fatigue since 2018.

Following an assessment including investigations, I can confirm Ms Craker's symptoms and presentation meet the diagnostic criteria for ME/CFS, as outlined in the NICE guidelines (2021).

We discussed the therapeutic options available to us in the service and we jointly agreed that she may benefit from participating in individual sessions within our service. She will be contacted in due course.

Please feel free to contact the service if you require any additional information.

Yours sincerely,

Approved but not signed to avoid delay
