UR: NA
Lab #:24-83053369
Ref:00639065

Phone: 13 61 99

Dr Johannes Conradie

Holo TC Assay (Siemens Atellica) 45 pmol/L (> 40)
(Serum Active Vitamin B12)

Comment:

The Active B12 is in an indeterminate zone, particularly for patients with renal impairment, who may be B12 deplete despite an Active B12 within the reference interval.

Correlation with total B12 and homocysteine levels is required.

If Pernicious Anaemia (PA) remains a possibility, consider screening with intrinsic factor antibody (IF-Ab) and gastric parietal cell antibody (GPC-Ab) if these have not been performed in the recent past.

Instrument: Siemens Atellica

Haematologist: Dr Maan Alwan
