 Lab No 74855050

hs-Troponin T 7 ng/L

74855050 Comments: hs-Troponin T
 The 99th percentile for the healthy population is 14 ng/L.

Normal result.

If clinical concern remains, repeat testing in 3-4 hours is usually sufficient to clarify the diagnosis.

If AMI is considered, TnT should ideally be performed when the patient is in a location where he/she can be monitored and resuscitated if necessary. A sample may be collected and referred for testing while awaiting ambulance transport.
