74855050 Automated Comment:

As per ISLH guidelines - Film not reviewed. If a film review is truly indicated, contact the laboratory within 24 hours of collection. Otherwise investigate any highlighted abnormalities as clinically appropriate.

Neutropenia may be a transient effect of an acute viral infection. Persistent neutropenia may be seen as a result of certain infections, hypersplenism, SLE/Rheumatoid, drug side effect, and sometimes as an ethnic familial disorder, or in older patients an early myelodysplasia. Correlate Clinically as well as with E+LFTs, Viral Serology, Lymphocyte Markers, ANA/RF if clinically appropriate. Otherwise, suggest repeat at a later date.
