## ANTINUCLEAR ANTIBODY SEROLOGY

TITRE	PATTERN
1:80	Speckled

A low titre ANA is present. Testing for anti-dsDNA and ENA is suggested in patients with suspected autoimmune disease. A low titre ANA may be found in a proportion of well individuals without clinical autoimmune disease.

A speckled pattern ANA may be associated with specific autoimmune disorders (e.g. Sjogren's syndrome) as well as organ specific autoimmune disorders (e.g. autoimmune thyroiditis) and chronic infective inflammatory or malignant disorders. Further antibody testing including anti-ENA, anti-dsDNA, rheumatoid factor or thyroid antibodies should be considered based on clinical presentation.

ENA and DNA results to follow.

For enquiries, contact Dr Paul Campbell 07 3121 4444  
 Patients should contact their referring doctor in regard to this result.
