Pathology report

WALKER, LIBERTY
FEMALE, 1997-08-16
2829 BALD HL RD, BELLATA NSW 2397

Requested: 2024-07-03 12:39:00
Collected: 2024-07-03 12:39:00
Completed: 2024-07-03 00:00:00

Observations

Test	Value	Unit	Range
Vitamin B12	328	pmol/L	156-740
Comment	For patients with total B12 levels in the low or borderline range, testing for active B12 (holotranscobalamin II) will automatically be performed to resolve B12 status. Active B12 is the biologically active fraction of total serum B12, and a superior indicator of B12 status. Up to 15% of individuals may have a deficiency of the carrier protein haptocorrin, which does not result in clinical B12 deficiency, despite low total B12 levels.		
Active Vitamin B12	98	pmol/L	> 40
Comment	This active B12 result indicates that the patient is likely to be vitamin B12 sufficient. Patients with renal impairment may still be B12 depleted despite an active B12 level within this range. For these patients, correlation with total B12, homocysteine and/or methylmalonate is required.

301                VITAMIN B12 AND FOLATE STUDIES
301
301 Vitamin B12      328 pmol/L      (156-740)
301 Active B12       98 pmol/L      (> 40)
301
301 Serum Vitamin B12 Assay:
301 |-----|
301 | DEFICIENCY | BORDERLINE | SUFFICIENCY |
301 |-----+-----+-----|
301 | <150 pmol/L | 150 - 300 pmol/L | >300 - 740 pmol/L |
301 |-----|
301
301 For patients with total B12 levels in the low or borderline range,
301 testing for active B12 (holotranscobalamin II) will automatically be
301 performed to resolve B12 status. Active B12 is the biologically active
301 fraction of total serum B12, and a superior indicator of B12 status. Up
301 to 15% of individuals may have a deficiency of the carrier protein
301 haptocorrin, which does not result in clinical B12 deficiency, despite
301 low total B12 levels.
301
301 Serum Active B12 Assay:
301 This active B12 result indicates that the patient is likely to be vitamin
301 B12 sufficient. Patients with renal impairment may still be B12 depleted
301 despite an active B12 level within this range. For these patients,
301 correlation with total B12, homocysteine and/or methylmalonate is
301 required.
