Conder Surgery  
3/3 Sidney Nolan Street  
Conder ACT 2906

Dear Svitlana

**RE: MR ROMEN SAVESK - DOB: 06/01/87  
UNIT 6/114 BARR SMITH AVENUE BONYTHON ACT 2905**

It was my pleasure to review Romen today.

He came in for a follow-up visit to discuss the result of cardiac MRI.

Cardiac MRI is not formally reported. Looking at the images with Dr Kalam, there is a small pericardial effusion around the RV. Otherwise normal left ventricular size, wall thickness and function. Normal right ventricular size and function. No myocardial fibrosis, infiltration or infarction.

He was commenced on prednisolone weaning dose (15 mg for three days, 10 mg for three days and then 5 mg for five days) - prescription given.

I will chase his formal cardiac MRI report.

I will see him again in 6-12 weeks' time.

Thank you for continuing care and please feel free to contact me if you have any further questions.

Kind regards

**Dr Ahmed Khan**

Consultant Interventional Cardiologist
