

Pitt, Clare  
20-Dec-1985 - F  
54 Talbot Road  
South Launceston, 7249

201984381(THCI)  
439105(LGH)

**Test:** LGH - Elect Urea Creat (Serum)

**Collected:** 19-Sep-24, 16:00

**Group:**

**Received:** 19-Sep-24, 16:17

**Laboratory #:** 24N105826

**Clinician:** LIM,MING SHENG (272285CL)

✓ Signed

**Copies To:**

**Ordering Ward:** HC

**Ordering Unit:** GENMED

**Test Status:** Final results

| Test Type                                                                                                                                | Value     | Units         | Ref.Range | Normality |
|------------------------------------------------------------------------------------------------------------------------------------------|-----------|---------------|-----------|-----------|
| Sodium                                                                                                                                   | 136       | mmol/L        | 135-145   |           |
| Potassium                                                                                                                                | 4.1       | mmol/L        | 3.5-5.2   |           |
| Chloride                                                                                                                                 | 100       | mmol/L        | 95-110    |           |
| Bicarbonate                                                                                                                              | 23        | mmol/L        | 22-32     |           |
| Creatinine                                                                                                                               | 45        | umol/L        | 45-90     |           |
| Urea                                                                                                                                     | 3.4       | mmol/L        | 2.8-8.1   |           |
| eGFR(CKD-EPI)                                                                                                                            | >90       | mL/min/1.73m2 | >90       |           |
| Note                                                                                                                                     | See Below |               |           |           |
| From 1 Feb 2016 eGFR is calculated using the CKD-EPI formula. For details and limitations of use see MJA 197(4);222-223, 20 August 2012. |           |               |           |           |
