.ANAEMIA	Comment: .ANAEMIA Normal Iron Status. All patients with low or equivocal vitamin B12 results (400 pmol/L or less) will be routinely tested for holo-transcobalamin (active B12) to clarify the B12 status. Both tests are now Medicare rebateable. Vitamin B12 concentrations over 400 pmol/L are generally considered replete. Active B12 (holotranscobalamin) is the biologically active fraction of total serum B12, and should be a superior indicator of B12 status. Holotranscobalamin level indicates Vitamin B12 deficiency unlikely. Up to 15% of patients will have a deficiency of carrier protein (haptocorrin) that does not appear to result in a clinically recognisable Vitamin B12 deficiency despite low total Vitamin B12 levels.
