

Patient Name	CANDILORO, GEORGE	Accession	PR-10145485-MR
Patient D.O.B.	12/05/2015	Description	NOR-MRI BRAIN
Patient ID	PR-CBF435X	Study Date/Time	05/07/2023 14:38
Referring Physician	WIGNALL, ANDREW	Modality	MR

MRI HEAD
HISTORY:

Anosmia for investigation.

TECHNIQUE:

Noncontrast.

FINDINGS:

The sulcal pattern and ventricular calibre appear age appropriate. No FLAIR neuroparenchymal signal abnormality is seen. No abnormal restricted diffusion. No haemorrhage or microhaemorrhage. The pituitary gland appears unremarkable. There is complete opacification of the left sphenoid sinus as well as the right frontal sinus. No mastoid effusion seen.

COMMENT:

No intracranial pathology seen. There is complete opacification of the right frontal and left sphenoid sinuses.
