Patient D.O.B.	12/05/2015	Description	NOR-MRI BRAIN
Patient ID	PR-CBF435X	Study Date/Time	18/04/2024 13:21
Referring Physician	WIGNALL, ANDREW	Modality	MR,REG

MRI BRAIN

Clinical Details: Followup persistent sinus disease after treatment.

Findings:

There is no significant mucosal thickening in the paranasal sinuses, in particular, the changes in the sphenoid have resolved.

There is no septal deviation .

The optic nerves and carotid arteries follow a normal anatomical course.

CONCLUSION:

The sinus mucosal thickening has resolved.

Reporter: Dr Michael Lannan
