Tests requested	ARV						

Clinical notes

## ARBOVIRUS SEROLOGY

### ROSS RIVER SEROLOGY

Ross River virus IgG (EIA) **DETECTED**  
Ross River virus IgM (EIA) **DETECTED**

### BARMAH FOREST SEROLOGY

Barmah Forest IgG (EIA) Not Detected  
Barmah Forest IgM (EIA) Not Detected

Suggests recent or current Ross River virus infection. Please note that IgM antibody may persist for many months after primary infection.

No evidence of exposure to Barmah Forest virus (BFV). However, if history and clinical presentation are suggestive of BFV infection, repeat testing in 2-3 weeks may be considered to exclude delayed seroconversion.

This condition requires a notification to the Public Health Unit by laboratories. A copy of this report has been sent to the Public Health Unit in accord with the Public Health Act 2010 and the Public Health Regulation 2012.

Further information about this condition, and any action required for public health (eg contact tracing), is available on the NSW Health website [www.health.nsw.gov.au/infectious](http://www.health.nsw.gov.au/infectious) or from your local Public Health Unit on 1300 066 055.

All testing performed on serum or plasma unless otherwise specified.
