

## Radiology Report

Patient AUID: 7683541  
Patient Name: Hart, Emily Maree  
Patient Birth Date: 26-Jun-1991  
Referring Ward: N

Exam Date: 28-Oct-2024 11:00:00 AM  
Study Description: CT Spine - Lumbar  
Accession No: 5003255031  
Referring Physician: 2849508H Bardawil Khaled

### CT LUMBAR SPINE

Clinical Notes:  
Back pain radiating to right leg.

Report:  
Non-contrast CT lumbar spine performed.

Heights of vertebral bodies are within normal limits with no fracture or bony destructive lesion demonstrated.  
No spondylolisthesis or pars defect.  
Facet joints at all levels are enlocated.  
The sacroiliac joints have a normal appearance for the patient's age.

At L4/5, there is a mild diffuse disc bulge, worse on the left, causing mild left foraminal stenosis. Remaining lumbar intervertebral discs are within normal limits.  
No central canal stenosis identified.

Conclusion:  
Mild left foraminal stenosis at L4/5. No central canal stenosis.
