## ANA SCREEN, IFA, W/REFL TITER AND PATTERN

Analyte	Value
<b>ANA SCREEN, IFA</b>	<b>NEGATIVE</b> Reference Range: NEGATIVE
<p>ANA IFA is a first line screen for detecting the presence of up to approximately 150 autoantibodies in various autoimmune diseases. A negative ANA IFA result suggests an ANA-associated autoimmune disease is not present at this time, but is not definitive. If there is high clinical suspicion for Sjogren's syndrome, testing for anti-SS-A/Ro antibody should be considered. Anti-Jo-1 antibody should be considered for clinically suspected inflammatory myopathies.</p> <p>AC-0: Negative International Consensus on ANA Patterns <a href="https://doi.org/10.1515/ccIm-2018-0052">https://doi.org/10.1515/ccIm-2018-0052</a></p> <p>For additional information, please refer to <a href="http://education.QuestDiagnostics.com/faq/FAQ177">http://education.QuestDiagnostics.com/faq/FAQ177</a> (This link is being provided for informational/educational purposes only.)</p>
